

## Applications

**Trend Trader:** Our application. The name should be changed from *RobotX* to *TrendTrader*.

**TWS:** Application from Interactive Brokers. To be downloaded from <https://www.interactivebrokers.com>. (Search for TWS download).

Login with user "hanna408" and password "639bergman".

You will only use this for "paper trading" which means that you have a test account and all orders and money is fake.

## Functionality

**TWS:** Is a trading platform for buying and selling "instruments" like stocks, Options etc. Depending on the account you can have connections to almost all financial markets in the world. You can put orders and receive market data in real time. Market data can be prices (Last price, Highest price, Closing price yesterday etc) Orders can have lots of different conditions. Examples is "Market order" = Selling or buying a number of instrument to the best price the market can give me. "Limit order" = Selling or buying a number of instrument with a limit. (If buying then a maximum price, If selling then a minimum price),

**Trend Trader:** Communicate with TWS.
